CONTRACTORS

BACKUP

REPORTING

MONITORING

Totem Compliance Audits consist of building system policy questions based on the NIST cybersecurity framework that assess the risks for each of your building system contractors with a simple click to answer approach.

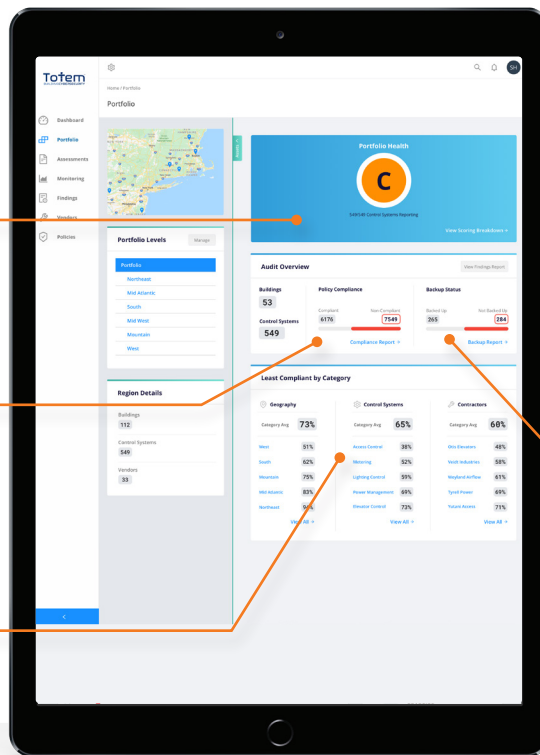

The audit are automatically sent out as a convenient weblink to each separate contractor on a scheduled basis and the results immediately processed when submitted.

Manage Your Entire Portfolio from Totem's Dashboard

Quickly identify the cybersecurity health of all your building systems

Quickly see policy compliance rates for all systems and contractors

View Results by geography, system type and contractors

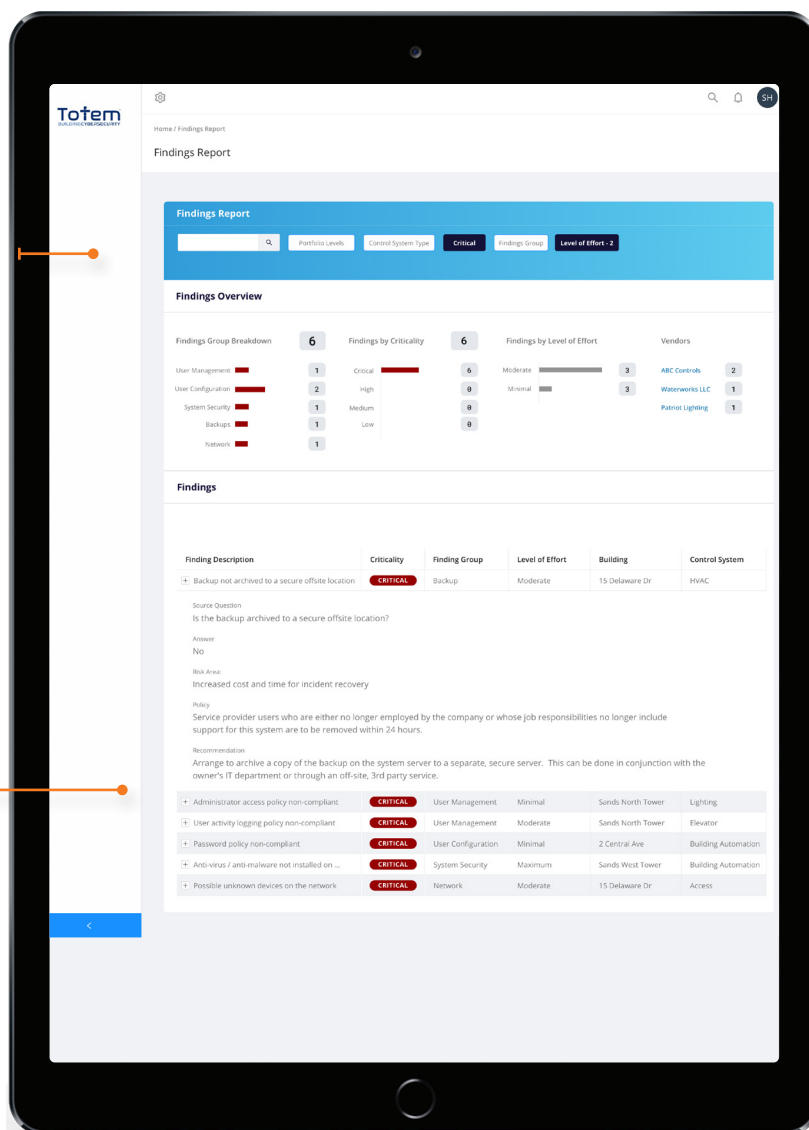

See the backup status of all your building systems at a glance

Quickly Drill Down into Each Audit to Identify the Gaps and Prioritize Next Steps

Compliance Results are Grouped by Category, Criticality and Level of Effort with Built-in Filtering

For Every Non-compliant Response Totem Provides Recommended Mitigation Options

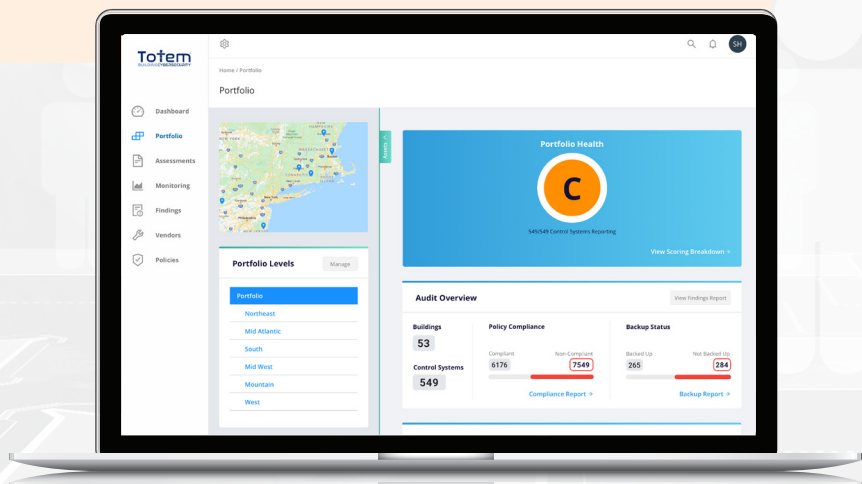

WHAT CAN YOU EXPECT?

- ✓ Totem Compliance Audits establish cybersecurity best practices for your company and building system contractors to follow
- ✓ OT Contractors will show Immediate Improvement
- ✓ The easiest changes are brought to the top for “quick fixes”
- ✓ Harder to Implement Improvements will become immediately visible
- ✓ Subsequent audits will prevent backsliding

Getting started can be done right from your desk with virtual contractor audits that put you on the way to a **powerful vendor risk management dashboard.**
